

IF4000 Stainless Knives

IF4000 knives stand for utter simplicity of use combined with relevant materials. A fully forged Stainless blade meets a Polyester and Melamine composite handle that provides a 'cool' to touch quality – closer to ceramic than to plastic.

During extensive development the qualities of balance, cutting angle, material production and authentic ergonomics, have been re-examined to create a knife program that is built on the experience of the Taylors Eye Witness Sheffield factory.

IF4000 knives are complemented by the Chantry Modern Knife Sharpener.

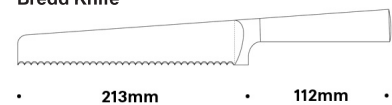

**Forged Hi-Carbon Stainless Steel
Polyester and Melamine Composite**

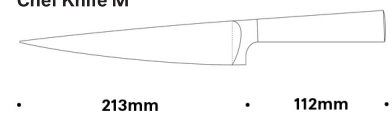

**Available in White or Black handle
Manufactured by Taylors Eye Witness, Sheffield
German 'IF' Gold Award, 2006
German 'Design Plus' Award, 2006**
