

IF4000 Knife Rack

A knife rack to compliment the IF4000 Kitchen knife program, as well as compatible with any Stainless Knife.

The simple block of solid Bamboo wood comes with template and screws and sits flush on a wall. It works by involving powerful earth magnets within the block itself. Bamboo was chosen because of its hard wearing characteristics and closed pore surface. It's more hygienic than a knife block and much easier to reach for the right knife. The rack can accommodate between 6 to 10 knives, depending on their size.

Size 450 x 60 x 30mm
Bamboo Wood with fixings

Available in Bamboo
Manufactured by Taylors Eye Witness, UK
German 'Design Plus' Award, 2006

This product is made from Sustainable Bamboo.
It can be lightly sanded for lasting use.

Hidden fixings allow the knife rack to appear as a floating block of wood.
